

WHICH REDUCER?

PICK THE SPEED BY TEMPERATURE

Fast, medium, slow or extra slow

@thespraysource

BELOW 65F

AR-3060 FAST

Cool shops, fast airflow, small repairs

@thespraysource

65 TO 80F

AR-3070 MEDIUM

General purpose

@thespraysource

80 TO 90F

AR-3080 SLOW

Warm shops, full panels

@thespraysource

90F AND UP

AR-3090 EXTRA SLOW

Low airflow, full vehicles

@thespraysource

TEXTURE? GO SLOWER

RUNS? GO FASTER

The rule of thumb

@thespraysource

HUMIDITY ABOVE 80%?

DO NOT SPRAY

Humid day: slower reducer so the clear does not blush

@thespraysource

COLD GARAGE?

FASTER REDUCER, LIGHTER COATS

Warm the panels and the paint to room temperature first

@thespraysource

MATCH THE ACTIVATOR TOO

AH-7103 FAST, 7105 MEDIUM, 7107 SLOW

Fast for cool shops, medium for 65 to 80F, slow for warm

@thespraysource
